EXECUTIVE SUMMARY

(write this section last)

The Executive Summary should summarize the most important points from your business plan.

COMPANY OBJECTIVES

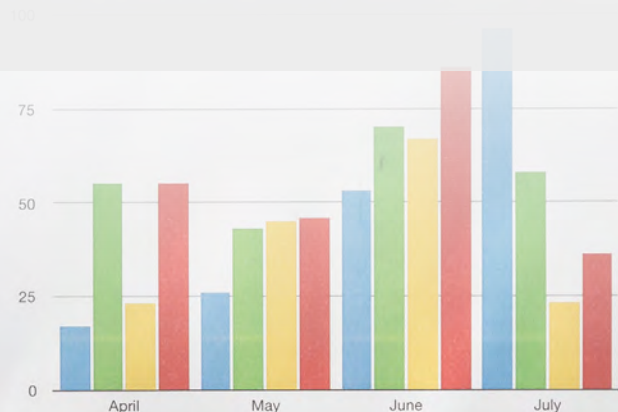

What to include here:

- Nature of your business
- Opportunity you want to capture
- What are your business goals in the short term, long term?
- What are the timelines and revenue targets

Nature of business. KindredCare ('the Company') is an intelligent caregivers recruitment platform for seniors and their family members. The rich-feature platform is designed to facilitate the entire process from a granular, location-based search to interviewing, background checking, scheduling, verification of visit, invoicing, and payment. KindredCare can be used directly by seniors in an in-home setting or through Long Term Care (LTC) facilities.

Opportunity. The fast-growing seniors' population, caregiver shortage and existing inefficiency of the caregiver hiring system for seniors present a unique opportunity to KindredCare. By 2046, the population aged 85 and older could triple to nearly 2.5 million people while the larger demographics of seniors aged 65 and over is estimated to number 10.4 million by 2037. KindredCare is well positioned to address the immense demand for caregivers among the sizeable and fast-growing seniors' market with its automated, intelligent comprehensive recruitment platform for caregivers.

KindredCare forecasts a first-year revenue of \$284k with the hiring of three (3) employees. By the end of year 3, KindredCare anticipates achieving \$3.2 million in gross revenues with the hiring of six (6) employees.

China America France Japan Germany

BUSINESS DESCRIPTION

What to include here:

- What problem are you solving or what solution are you providing for your customers?
- Do you have a minimum viable product (MVP)?
- What are the current major initiatives of your business?
- What is your current status of your business? Have you sold any product?

Problem. KindredCare addresses the staffing shortages experienced by nursing and seniors' homes across Canada as well as challenges such as absenteeism and increased overtime hours. Meanwhile, caregivers bear the brunt of extended work hours, decreased vacation time and changes in the methods of delivering care leading to job stress or burnout. Over half of nursing homes and approximately half of seniors' homes reported an increase in critical staffing shortages, especially in key roles including personal support workers.

Solution. KindredCare is designed to create a robust, intelligent caregiver recruiting system for seniors living in their homes and in LTC facilities. The intelligent search will accurately match seniors with caregivers according to the needs of the seniors, the skillset of the caregivers, location, availability, and other pertinent factors to increase the success of the tasks. On the macro level, KindredCare seeks to address the labour shortage but allow prospective caregivers such as new immigrants and international students, among others, to fill the staffing shortages by offering caregiving service to seniors. The seamless process on the platform will enable LTC operators to quickly hire and manage the assignments of caregivers to LTC residents according to an on-demand basis.

KindredCare has yet to produce its minimum viable product (MVP) of the software. To date, the founders have identified the AI-driven technology concept and its application that addresses the staffing shortage for caregivers in Canada. They will outsource the MVP development in their home country while waiting for their permanent resident card.

PRODUCTS AND SERVICES

What to include here:

- What products or services do you plan to sell or are already selling?
- What portion of the revenue does each product or service represent?

KindredCare offers a comprehensive, AI-driven recruitment platform for caregivers, designed to ensure client satisfaction and maximize the retention rate among caregivers. The platform performs an advanced search for available caregivers and facilitates communication with seniors and their family members. The platform further utilizes automated background checks through Optical Character Recognition (OCR) on scanned document and an electronic visit verification (EVV) system to ensure the safety of seniors. Clients can further receive an invoice and make a payment to caregivers directly on the platform. KindredCare's robust platform caters directly to patients and to LTC operators (all features are also available to caregivers providing the services through LTC). Seniors will be able to select from a wide range of caregiving services, with the focus on leading chronic conditions.

For future development, KindredCare may be able to incorporate remote health monitoring by integrating the monitoring software with the platform for family members to receive an alert upon anomalies of heart rate, blood pressure, oxygen level, and other vital signs.

Revenue per Service. KindredCare will price an average monthly subscription at \$240 for LTC operators and a commission fee of 7.5% for each caregiving task completed on the platform. Payments are automatically processed – KindredCare receives payment from the senior clients and sends payment to caregivers at an agreed-upon fee while retaining the 7.5% commission fee. The Company anticipates receiving 80% from its revenue from the commission fee and 20% from the monthly subscription fee.

INTELLECTUAL PROPERTY

What to include here:

- Does your business have intellectual property (IP) - trademarks, patents, copyrights?
- What is the current status of your IP?
- What is your plan for IP to be part of your Canadian company?

The Company will protect its IP by filing a copyright for the software code. The co-founders anticipate completing the minimum viable product (MVP) prior to their arrival in Canada. They will be applying for the copyright and patent with the Canadian Intellectual Property Office (CIPO) prior to their arrival.

FINANCIAL DISCUSSION

What to include here:

- Describe how you will monetize your product or service? What is your sales model?
- When do you expect to breakeven?
- When do you expect to be profitable?

KindredCare will generate revenue from an average monthly subscription of \$240 for LTC operators and a commission fee of 7.5% for each completed caregiving task processed on the platform. The monthly subscription fee allows LTC operators to have direct access for sourcing, searching, interviewing, and processing payment to caregivers to meet the on-demand needs of the LTC facility.

The Company anticipates breaking even in its 9th month of operations or 12th month from the arrival of the co-founders. KindredCare forecasts a first year revenue of \$284k and a net profit of \$26.2k. By the end of year 3, KindredCare anticipates achieving \$3.2 million in gross revenues and \$2.1 million in net profits, or 65%.

KEY PEOPLE

What to include here:

- Who are the main executives / advisors in your business?
- What experience do they bring to their role?
- What are their current responsibilities within the company?
- Who is moving to Canada? Are any remaining in their home country? What is the timeline?

KindredCare is the brainchild of its founding team, which is comprised of scientific, human resources and social welfare and finance and accounting professionals.

Sarmin Akter, CEO. Mrs. Akter contributes a decade's experience in human resources and social welfare, including three years in a senior role within the fashion industry. Mrs. Akter is responsible for establishing the Company's policies and procedures and managing hiring and employee training, as well as liaising with external vendors (marketing agency, software publishers, etc.).

Dr Tanzila Rawnuck, COO. Dr. Rawnuck has over 13 years' research and academic experience while concurrently serving as a shareholder and policy developer with a pharmaceutical company in Bangladesh, Kemiko Pharmaceutical Company. She has further accumulated seven years' experience with a giant multipurpose company, as a shareholder. Her extensive entrepreneurial and business management experience will contribute insights to KindredCare's business and marketing strategies and management. Dr. Rawnuck is responsible for implementing KindredCare's business strategy and developing strategic partnerships for the platform development, business developments and marketing and sales strategies.

MD Jahangir Alom, CFO. Mr. Alom holds over 13 years of experience in accounting, finance and internal auditing. Mr. Alom is responsible for offering operational guidance, developing effective compliance, accounting, treasury policies, and evaluating future decisions based on financial objectives and performance.

All co-founders will be moving to Canada as soon as they are granted permanent resident cards.

RISK ASSESSMENT AND CONTINGENCY PLAN

What to include here:

- What are your company's weaknesses (internal), threats (external) that could be a problem for your business plans?
- Is there any risk in ability to hire the correct people?
- Is there any risk if your competitors get to market first? Is there risk of missing the opportunity if your business plans are delayed?
- Are there any changes to laws or regulations that may affect your business?
- How will you monitor, measure and respond to these risks?

As an intelligent caregiver recruitment software, KindredCare's launch and growth will suggest the following possible risks:

Market Adoption Risk. The caregiver community and LTC operators will be unfamiliar with the software. The Company will mitigate the risk by launching both digital marketing campaigns targeting caregivers, and direct marketing to senior and LTC associations to demonstrate the software capabilities.

Competitive Risk. KindredCare's timely rollout will mitigate against the threat of new and similar caregiver matching/recruiting platforms for seniors and LTC homes. There is currently no intelligent platform for facilitating recruitment of caregivers for seniors and LTC homes in Canada, which presents a unique opportunity to KindredCare.

Resources Risk. KindredCare's success will be further dependent on the credentials of its personnel. The co-founders will thus reach out to local universities – Durham College and Ontario Tech University - for potential hiring of their graduates to fill skilled positions such as AI software engineer.

Threat Mitigation. The Company will monitor the potential external threat by continually staying up to date with industry news through AGE-WELL, the Information and Communications Technology Council (ICTC) and other technology-based organizations that support technology applications for seniors and Canada's digital economy.

BUSINESS OVERVIEW

What to include here:

Provide a concise description of what you do and who you serve. Use this section to highlight your competitive position, include size of market, competitors and market & technological trends.

KindredCare is an intelligent caregiver recruiting system for seniors and LTC operators. The intelligent search will accurately match seniors with caregivers according to the needs of the seniors, the skillset of the caregivers, location, availability, and other pertinent factors to increase the success of the tasks. KindredCare caters to a fast-growing market of approximately seven million seniors in Canada.

The need for KindredCare's platform will be driven by the following factors:

- **Aging Demographic.** From 2016 to 2021, the number of Canadians aged 65 and older rose 18.3 per cent to seven million. From 6.2 million in 2017, seniors aged 65 and older are expected to number 10.4 million in 2037.
- **Increased Life Expectancy and Chronic Disease in the Elderly.** Between 2014 and 2036, the average life expectancy for a 65-year-old is projected to increase by 1.8 years for women (to 88.8 years) and by 1.9 years for men (to 86.5 years). Nonetheless, 90% of Canadians aged 65 and over live with at least one chronic disease or condition, such as cardiovascular disease, cancer, respiratory condition, diabetes, dementia, arthritis, or obesity. Chronic health conditions require more focus than ever before to ensure effective health care support and good health management.
- **An Increase in Health Spending by Senior Citizens.** According to the available data (2017), per-person spending on health care is substantially higher for Canadians aged 65 and older than for younger Canadians, with the disparity increasing as the average age increases beyond 65 years.
- **Low Percentage of Residents Receiving Palliative Care.** Only 6% of residents in nursing homes were receiving palliative care in the last year of life, according to a 2018 study by the Canadian Institute for Health Information (CIHI).

Competitive Position. The Company anticipates experiencing direct competition from caregiver staffing solution technology providers and indirect competition from traditional caregiver agencies. Nonetheless, there is currently only one Canada-based traditional caregiver agency, Visiting Angels. Thus, a quick roll out of the intelligent platform that delivers an advanced search for qualified caregivers and an online background verification will establish KindredCare's branding among the target markets. The co-founders plan on developing the MVP early for completion in Q2 2023 and beta testing in Q3 2023.

Market Trends. KindredCare will benefit from the higher adoption of technology among seniors. With many seniors staying at home more during COVID-19, two in 10 (19%) Canadians 65+ have been using an online platform for groceries, health, wellness, and/or independence (of whom 6 in 10 report utilizing it more due to COVID-19). The survey results show that 72% of Canadians aged 65 and over feel confident using current technology. This trend will favour the use of KindredCare's platform for seniors to select their own caregivers.

Technological Trends. KindredCare is specifically capitalizing on the fast adoption of artificial intelligence to improve identification, selection and retention of talent. The use of big data analysis assesses criteria that is more important to senior clients than what can be covered during an interview or a resume review. The Company will utilize technology to intelligently search and match from its database to improve sourcing, screening and scheduling caregiving tasks.

COMPANY STRUCTURE

Do you plan to operate in Canada as: (Tick which one applies.)

☐ Sole Proprietorship ☐ Partnership ☒ Corporation ☐ Professional Corporation

Do you have an existing company operating in your home country? ☒ Yes ☐ No

If yes – do you plan for the Canadian entity to be an extension of your current company? Tick which one applies.

☐ Parent Company ☐ Subsidiary Company ☒ Unrelated

☐ Hardware ☒ Software ☐ Service ☐ Retailer / Distributor

If Hardware, do you: (Tick which one applies.)

☐ Manufacture ☐ Contract Manufacture ☐ Assembly

DESCRIPTION OF BUSINESS

What to include here:

- What problem are you solving or what solution are you providing for your customers?
- Do you have a minimum viable product (MVP)?
- What are the current major initiatives of your business?
- What is the current status of your business? Have you sold any product?

Problem. KindredCare addresses the staffing shortages experienced by nursing and seniors' homes across Canada as well as challenges such as absenteeism and increased overtime hours. Meanwhile, caregivers bear the brunt of extended work hours, decreased vacation time and changes in the methods of delivering care leading to job stress or burnout. Over half of nursing homes and approximately half of seniors' homes reported an increase in critical staffing shortages, especially in key roles including personal support workers.

Solution. KindredCare is designed to create a robust, intelligent caregiver recruiting system for seniors living in their homes and in LTC facilities. The intelligent search will accurately match seniors with caregivers according to the needs of the seniors, the skillset of the caregivers, location, availability, and other pertinent factors to increase the success of the tasks. On the macro level, KindredCare seeks to address the labour shortage but allow prospective caregivers such as new immigrants and international students, among others, to fill the staffing shortages by offering caregiving service to seniors. The seamless process on the platform will enable LTC operators to quickly hire and manage the assignments of caregivers to LTC residents according to an on-demand basis.

KindredCare has yet to produce its minimum viable product (MVP) of the software. To date, the founders have identified the AI-driven technology concept and its application that addresses the staffing shortage for caregivers in Canada. They will outsource the MVP development in their home country while waiting for their permanent resident card.

INTELLECTUAL PROPERTY

What to include here:

- Does your business have intellectual property (IP)?
- What is the current status of your IP?
- What is your plan for IP to be part of your Canadian company?

The Company will protect its IP by filing a copyright for the software code. The co-founders anticipate completing the minimum viable product (MVP) prior to their arrival in Canada. They will be applying for the copyright and patent with the Canadian Intellectual Property Office (CIPO) prior to their arrival.

INDUSTRY OVERVIEW & TRENDS

What to include here:

- What is happening in your industry, or in the market where you are selling or plan to sell? This can have a positive or negative impact on your company.
- Is there a demand for your product or service? Have you done any market validation?
- Do you have competition? Competition is good, it suggests that there is a market for your product or service.
- Is your business regulated? How do the regulations impact your business?

KindredCare operates within the global market for Health Caregiving estimated at USD111.2 billion in the year 2020; this is projected to reach a revised size of USD 213.9 billion by 2026, growing at a CAGR of 11.2% over the analysis period.

Canada has gained prominence as an innovative leader in technology for healthy aging. For example, AGE-WELL is established as a unique Canadian network for developing technologies and services for healthy aging. It trains the next generation of innovators in this field to position Canada as a world leader in technologies that help aging populations everywhere. In addition, Dig-IT is a HelpAge Canada program that offers devices, data, education, and technical support for low-income Canadian seniors to join the digital world. The Company will consider networking with these organizations for the development and marketing of its platform.

Validated Demand for Intelligent Recruitment. AI-based solutions are already successfully being deployed by large staffing agencies and Fortune 500 companies. AI is able to perform the redundant, repetitive work that slows down recruiters, giving them back the time they need for value-added responsibilities, such as networking, relationship-building, interviewing qualified candidates, and making well-informed hiring decisions.

Competitive Landscape. The Company anticipates experiencing direct competition from caregiver staffing solution technology providers and indirect competition from traditional caregiver agencies. Nonetheless, there is currently only one Canada-based traditional caregiver agency, Visiting Angels. Thus, a quick roll out of the intelligent platform that delivers an advanced search for qualified caregivers, an online background verification and an electronic visit verification (EVV) system will establish KindredCare's branding among the target markets. The co-founders plan on developing the MVP early for completion in Q2 2023 and beta testing in Q3 2023.

Regulatory Requirements. KindredCare will not require any license or permit to operate in Canada. KindredCare is committed to facilitating compliance with all stakeholders – seniors, caregivers and LTC management. It will adhere to relevant Canadian regulations such as the Canada Labour Code and the Personal Information Protection and Electronic Documents Act (PIPEDA) for ensuring business viability and continued growth.

TECHNOLOGICAL TRENDS

What to include here:

- Are new technologies disrupting your industry?
- What is your plan to deal with emerging technological trends in your industry?
- What technology are you using and how do you maintain it?

KindredCare utilizes AI for improving the efficiency and effectiveness of the hiring process. AI is a valuable tool in reducing the time spent on repetitive and mundane tasks. The technology can be smoothly integrated into the recruitment process by utilizing software for matching candidates with job requirements, interview scheduling or resume screening for specific keywords. Up to 40% of a recruiter's time can be spent entering data into a database or sorting through resumes. This time is far better spent engaging with candidates, building relationships and improving candidate experience.

THE MARKET

OVERVIEW OF MARKET TRENDS

What to include here:

- What group of customers do you serve?
- What is the size of the customer group? Is this number growing? Changing?
- How is customer behaviour expected to change?
- Are there new products or services that have emerged?
- Are there regulatory changes that affect your potential customers or their ability to buy your product or service?

KindredCare addresses the needs among seniors and LTC facilities with its intelligent platform for recruiting caregivers from an advanced search to interviewing and automated background checking, as well as invoicing and payment processing. As an aging society, Canada has a growing need for chronic and long-term care provision. The number of older adults (65+) requiring care will double (CMA 2016) by the year 2046; up to 80% of all care of older adults is estimated to be provided by informal carers, often over several years. Common care duties include providing transportation, housework, house maintenance, scheduling and coordinating appointments, and emotional support. Unpaid carers often endure adverse consequences in personal health and well-being and experience a number of employment-related consequences such as reduced productivity, absenteeism, presenteeism, high turnover intentions, and decreased job satisfaction.

Size of Customer Group. It is estimated that over 1.5 million Canadians requested senior home care services in 2019. By 2031, demand is expected to rise by 55% to over 2.3 million Canadians. Home care will continue to account for the largest part of care demand, accounting for 75% of clients in 2031. Women represent the greatest care needs given their higher utilization and the fact that they represent a larger percentage of the population in older demographic cohorts.

LTC Segment. By segment, there were 380,000 Canadians with demand for long-term care in Canada in 2019, including 302,576 in care and 77,448 on waitlists for long-term care. As the number of people in older age cohorts continues to increase, the demand for long-term care will increase too, which is expected to hit 606,000 patients in 2031 - an increase of 59.5 % from 2019 levels.

Homecare Segment. Over 1.1 million Canadians requested home care in 2019. This included existing home care clients (92.3% of the total) and seniors who were exclusively receiving informal care but wanted to receive professional home care services (7.7% of the total). By 2031, the number of Canadians with home care needs will increase by 615,479 to just over 1.7 million. This represents a 53% increase in demand over that timeframe.

New Products and Services. The industry has witnessed the increasing use of technology to address labour shortage in the health sector, which for the foreseeable future is permanent given boomer health care needs and staffing shortages. A leading home care agency, Home Instead, has partnered with Honor Home Health to incorporate technology in the labour market to professionalize caregivers in the unskilled areas to reduce industry churn. Furthermore, technology has been integrated with in-home care for seniors. For instance, Comfort Keepers uses technology solutions to improve transparency of care, reduce social isolation and improve engagement. Caregivers are trained to utilize a variety of technologies to foster connection and purpose for seniors and their loved ones.

Regulatory Changes. KindredCare's senior clients will benefit from the following:

- The Canada Health Act, which has leveraged the use of federal spending power to achieve national health care policy objectives and set national standards. There has been a unanimous call to expand the act to explicitly include long-term care as an insured service, like hospital and medical services. Should this come to be realized, the inclusion of LTC as an insured service will encourage seniors, especially those with chronic conditions to receive care at LTC facilities.

TARGET MARKET

What to include here:

- Describe your ideal customer.
- What are their needs?

KindredCare caters to a fast-growing market of seniors in Canada. As of July 1, 2021, there were 7,081, 792 seniors aged 65 years and older. By 2030, there will be 9.5 million seniors who comprise 23% of the Canadian population. Canadians are expected to live longer too. By 2036, the average life expectancy for a 65-year-old is projected to increase by 1.8 years for women (to 88.8 years) and by 1.9 years for men (to 86.5 years).

Profile of Seniors Over 65 in Canada. Understanding the profile of seniors over 65, specifically how they receive caregiving, will provide insights into KindredCare's development:

- Seniors are helping other seniors. Nearly one-quarter of seniors aged 65 and older (about 1.5 million people) provided care or help to family members or friends with a long-term condition, a physical or mental disability or problems related to aging. One-third (34%) of all caregivers aged 65 and older provided care for a spouse or partner. This proportion increased to 47% when focusing on seniors aged 75 and older, and to 50% for those aged 85 and older.
- One-third (33%) of seniors' caregivers reported that their caregiving responsibilities were stressful or very stressful. Stress related to caregiving varied significantly depending on the number of hours spent on caregiving and had a stronger effect on senior women.
- The most common sources of support for seniors' caregivers were help from their children (41%) and help in the form of their spouse modifying their life or work arrangements (41%). They also received support from extended family (28%) and close friends and neighbours (23%).

KindredCare's platform for intelligent matching between seniors and their caregivers will enable the families of seniors to conveniently select available caregivers based on their criteria and care requirements. Furthermore, the above statistics appropriately justify the Company's strategy to market the platform to the families of seniors.

By Region. Across Canada's regions, the Atlantic Provinces had the oldest residents, with 22.6% of their population aged 65 and older. At the other extreme, the provinces with the lowest percentage of senior citizens (those aged 65+) included Alberta (14.8%), Manitoba (17.1%) and Saskatchewan (17.5%).

Market Needs

- Extended Vacancies in Caregiving Positions. In the first quarter of 2020, prior to the full impacts of COVID-19, the employers of home support workers (HSWs), housekeepers and other related occupations had 46% of their job vacancies unfilled for more than 120 days. This figure is nearly double the all-occupation average of 24%. Further, 91% of businesses employing HSWs said they were constantly recruiting compared to 50% across all occupations. These figures suggest that finding labour to support this demand may be difficult.

- Aging at Home. Aging at home has become a trend in recent years, as compared to staying in long-term care facilities. Patients kept in long-term care are likely to require more intensive care than the general population receiving home care. Therefore, it is assumed that these patients have higher-needs and will receive 22.2 hours of care per week where home care clients receive an average of 4.9 hours of care per week. With this shift, nearly 37,000 fewer Canadians will be using long-term care in 2031 and instead will rely on home care. Subsequently, the cost of providing long-term care is estimated to decline by \$2.5 billion in 2031 while the cost of home care provision increases by \$1.6 billion.

MARKET SIZE

What to include here:

- Total addressable market (TAM)
- Serviceable addressable market (SAM)
- Target - primary / secondary

KindredCare's Total Addressable Market (TAM) is represented by seniors aged 65 and older. As of July 1, 2021, there were 7,081,792 seniors aged 65 years and older in Canada. The Company anticipates reaching 10% of its TAM with its marketing campaign, or 708,179, as its Serviceable Addressable Market (SAM). KindredCare further anticipates a 5% conversion rate over its sales activities and thus closing 35,409 senior clients over the 3-year period.

For the monthly subscription fee for LTC providers, the Company will promote the platform to 2,076 LTC operators in Canada. Canada has both public and privately owned, publicly funded LTC homes offering 24-hour nursing care. Privately owned LTC homes can be further subdivided into for-profit and not-for-profit organizations. KindredCare aims to reach out to 80% of this market.

The Company does not specify caregivers as its target market as there are no definite statistics for paid caregivers since the majority of caregivers are unpaid (members of family of the seniors). The barrier to the occupation is fluid, i.e., anyone can fill in as a caregiver as they wish with everyone's ability to provide basic care for another person.

PRODUCTS & SERVICES

What to include here:

- What products or services are you currently selling?
- What portion of overall revenues does each product or service represent?
- How do your products or services fit within the overall market?
- How can your products or services evolve to respond to market changes?

KindredCare's intelligent hiring platform delivers end-to-end features for simplifying the process of hiring and managing caregivers. The platform will offer a specific user experience for the clients, caregivers and LTC homes. The platform's features encompass:

- Advanced Intelligent Search. Senior clients and their family members can search for caregivers based on their location and specific skillsets, i.e., ability to assist patients with issues such as Alzheimer's, immobility, etc. Availability is also a key criterion. It will utilize the tagging feature for identifying highly-specific experiences such as providing care for a particular disease for delivering sophisticated matching between users.
- Automated Background Verification for Caregivers. The platform's verification process allows for document recognition technology that automates verification once all pertinent documents are uploaded onto the system. KindredCare will implement the Optical Character Recognition (OCR) technology and electronic Know Your Customer (KYC) for onboarding and verification purposes. The OCR technology allows caregivers to upload a scanned document. KindredCare can potentially incorporate online identity verification software that offers KYC such as ShuftiPro(<https://shuftipro.com/canada/>);
- Electronic Visit Verification. For ensuring the safety of seniors and for managing payroll purposes, caregivers will verify their identification upon entering and leaving the seniors' premises. The timed check-in and check-out will be further used for payroll data on the platform. This feature is for all caregivers working independently or with the LTC. The software will display the date and location of service, type of service, names of individual receiving and providing the services and the time service begins and ends. The latter will be input to the payment invoice to the seniors.
- Chatbot technology for onboarding process including providing information and registrations to seniors, family members and caregivers
- Payment Processing. The platform will process automated invoicing and payment upon completion of the assignment within a specified period of time. A range of accepted payment methods will be incorporated onto the platform such as credit card, PayPal, Stripe, Square, and others.
- KindredCare Trust Score. The Trust Score will benefit senior clients as they will view a shortlist of best candidates for senior clients.

Benefits

KindredCare offers the following benefits:

- Improved caregiver and client/patient satisfaction
- Improved caregiver retention rates
- Increased referrals
- More efficient back-office processes with the automation of search, review of qualifications, background check, scheduling, and invoicing and payment processing
- Improved relationship between agency and client/patient's family
- Attracting prospective caregivers to the occupation
- Increased profit – business growth and success

Our platform will utilise an eKYC platform to verify our users. An example of a third party provider we are considering is <https://shuftipro.com/canada/>. You can note that they also provide OCR capabilities for developers, which should allow more traditional documentations to easily be processed. This is important considering the age of our user group is generally older.

AML checks are conducted simultaneously for caregivers AND patients. Some caregivers have expressed that they would feel safer using a digital platform if the patients were also background checked. While optional, this can improve the safety for all our users and we intend to recommend it.

THE COMPETITION

COMPETITORS & TYPES OF COMPETITION

What to include in here:

- Who are your direct competitors?
- Who sells similar products or services?
- Can you also identify indirect competitors?

Include a comparison chart: characters/qualities, list of competitors, and check marks. See **Competitive Analysis Chart template** on page 18.

KindredCare anticipates a moderate competition upon launching in Canada. The start-up will directly compete with websites and online applications that facilitate matching between caregivers and senior patients both for in-home care and long-term care. The majority of providers are primarily serving as traditional agencies while KindredCare's digitization process and AI algorithm are designed to bypass the manual selection of the appropriate caregivers for the senior client. KindredCare is specifically distinguished by the use of AI to perform a granular search, based on the specific skillsets of the caregivers and the patient's condition and requirements, online background verification and electronic visit verification technology, as well as the availability of the application for both in-home and long-term care home settings.

KindredCare's distinguished innovation includes: 1) the Machine Learning-powered intelligent algorithm for matching seniors with caregivers according to detailed requests and qualifications including personality, personal interests to ensure a pleasant collaboration between caregiver and senior client; 2) the Optical Character Recognition (OCR) technology and electronic Know Your Customer (KYC) for onboarding and verification purposes. The OCR technology allows caregivers to upload a scanned document.

KindredCare can potentially incorporate online identity verification software that offers KYC such as ShuftiPro; chatbot technology for onboarding process including providing information and registrations to seniors, family members and caregivers; 4) the tagging feature for identifying highly-specific experiences such as providing care for a particular disease for delivering sophisticated matching between users.

Competitors to KindredCare include:

The Helper Bees, an Austin-based online platform, matches seniors with caregivers. The company collects details on the needs, preferences and other personal details of the seniors and matches them with helper bios, skills and expertise. The company's matching technology suggests the most suitable recommendations. Services include transportation to doctor's appointments, discharge planning from hospital or rehab and Alzheimer's care, among others.

Honor Technology, a San Francisco-based online platform, offers elderly care services. It allows users to search for nearby care providers and book appointments on an hourly basis with a different premium plan for a desired date and time. It allows users to communicate with caregivers. It offers an app for caregivers to find jobs like assisting adults with lifting and transferring, reminding clients of physical activity and others. Honor Technology is associated with Home Instead, which provides personalized in-home care services for aging adults, safely in their own homes.

The company faces mild competition from among traditional caregiving agencies such as Comfort Keepers and Visiting Angels. Comfort Keepers offers in-home care for seniors and other adults in need of assistance. Instead of offering medical care, the caregivers are trained to offer transportation and support including driving to doctor's appointments, grocery shopping, companionship, and personal care.

Visiting Angels. Visiting Angels is an agency providing home care, palliative care, Alzheimer and dementia in addition to companionship and household duties. It is not a platform for matching providers with senior clients but an agency for seniors. Therefore, Visiting Angels only caters to geographically-limited areas.

SALES & MARKETING

CUSTOMERS

What to include in here:

- Do you have customers today?
- Have you sold any product or services?
- Do you know how to monetize your product or service?
- What is your sales model?
- Are you selling through a distribution channel or direct sales to the end user?

KindredCare is currently still within the second Technological Readiness Level. Thus, the platform's MVP has yet to be developed and the Company has yet to onboard any clients.

KindredCare will generate revenue from an average monthly subscription of \$240 for LTC operators and a commission fee of 7.5% for each completed caregiving task processed on the platform. The Company anticipates receiving 80% from its revenue from the commission fee and 20% from the monthly subscription fee.

Distribution Channels. KindredCare will market the platform through the family members of seniors. The Company further markets the platform to senior care homes that will onboard their senior guests to the platform.

SUPPLIERS

What to include in here:

- Have you identified your suppliers?
- Are you building a manufacturing facility and where? or do you plan to contract manufacture?
- Are you reliant upon web services or logistics providers i.e. amazon, etc.?
- Have you started any discussions or relationships with your suppliers?

KindredCare will obtain the services of Amazon Web Services for its customer relationship management (CRM) software such as Salesforce and Microsoft Office to manage basic functions, i.e., email correspondence, Word processing, etc.

PRODUCT / INVENTORY

What to include here:

- Do you have a prototype?
- Have you done any production runs?
- Do you have any starting inventory? Do you need to hold inventory?

As a chiefly software company, KindredCare does not hold any inventory.

RESEARCH & DEVELOPMENT

What to include here:

- Do you have any R&D work to be done?
- Is your product commercialized?
- Using the Technology Readiness Level chart, identify and describe which stage your new product or service is at in its development? **(Example TRL table on page 23)**

KindredCare is currently within a second Technology Readiness Level (TRL). The co-founders have identified the software that incorporates AI for enabling an advanced search for caregivers complete with the background verification and visit verification, as well as invoicing and payment processing.

The co-founders will focus on providing the basic search feature and accumulating data to apply machine learning and subsequently the intelligent search to the platform. The development will further focus on the integration of the EVV and payment processing to round out the features to facilitate an end-to-end recruitment process for caregivers.

The co-founders will outsource the MVP development to a third-party software development company overseas. They will commence the MVP development upon the issuance of the Letter of Support.

TECHNOLOGY READINESS LEVEL (TRL)

1	BASIC PRINCIPLES OF CONCEPT ARE OBSERVED AND REPORTED
2	TECHNOLOGY CONCEPT AND/OR APPLICATION FORMULATED
3	ANALYTICAL AND EXPERIMENTAL CRITICAL FUNCTION AND/OR PROOF OF CONCEPT
4	COMPONENT AND/OR VALIDATION IN A LABORATORY ENVIRONMENT
5	COMPONENT AND/OR VALIDATION IN A SIMULATED ENVIRONMENT
6	SYSTEM/SUBSYSTEM MODEL OR PROTOTYPE DEMONSTRATION IN A SIMULATED ENVIRONMENT
7	PROTOTYPE READY FOR DEMONSTRATION IN AN APPROPRIATE OPERATIONAL ENVIRONMENT
8	ACTUAL TECHNOLOGY COMPLETED AND QUALIFIED THROUGH TESTS AND DEMONSTRATIONS
9	ACTUAL TECHNOLOGY PROVEN THROUGH SUCCESSFUL DEPLOYMENT IN AN OPERATIONAL SETTING

Government of Canada website -2018-01-23 - <https://www.ic.gc.ca/eic/site/080.nsf/eng/00002.html>

ADVERTISING & PROMOTION

What to include here:

- How do you plan to reach & sell to your ideal customer?
- Have you started?

KindredCare's initial marketing objectives are to:

- Gain a rapid and widespread awareness of the intelligent caregiver hiring platform among senior communities in Canada
- Showcase the effectiveness of the platform in delivering a granular search and seamless caregiver hiring process for seniors
- Acquire a growing clientele of seniors and LTC home operators
- Establish a reputation as a sterling brand that warrants growing senior clients

For achieving these objectives, KindredCare will execute the following marketing strategies:

- Launch a press release on the product launch that highlights the proven effectiveness of the intelligent caregiver hiring platform
- Participate in networking events, webinars and seminar opportunities with seniors' associations and non-profit organizations

Marketing for KindredCare will encompass:

Digital Marketing

KindredCare's website will utilize search engine optimization (SEO) for an optimum search engine marketing campaign. Furthermore, Google AdWords offers pay-per-click (PPC) advertising, cost-per-thousand impressions (CPM) advertising and site-targeted advertising for rich-media ads for generating immediate traffic.

Sponsored Articles/Blogs

KindredCare will contribute sponsored articles/blogs on online magazines such as Caregiver Solutions and in Long Term Care Today, the official magazine publication of the Ontario Long Term Care Association, published three times per year, with a readership of 5,800 long-term care-related carers across Canada.

Networking with Associations

KindredCare will become a member of industry associations with the objective of promoting its software on their websites, contributing educational articles and more. The Company will consider registering with the following associations:

- British Columbia Seniors Living Association (BCSLA)
- Ontario Retirement Communities Association
- Ontario Long Term Care Association
- Canadian Association for Long Term Care (CALTC)
- Canadian Seniors Association

PRICING & DISTRIBUTION

What to include here:

- How do you price services or products?
- How do you deliver services or products?
- Have you sold any product ? Do you know if your customer will pay for your product service?
- Have you validated what your customer is willing to pay?
- Have you thought about product guarantees or warranties needed?

KindredCare will generate revenue from an average monthly subscription of \$240 for LTC operators and a commission fee of 7.5% for each completed caregiving task processed on the platform. The Company anticipates receiving 80% from its revenue from the commission fee and 20% from the monthly subscription fee.

KindredCare will apply a lower-than-agency fee of 7.5%, which ranges from 10-15% for ensuring market acceptance. The 7.5% fee will be applied to payment paid by seniors. The platform's efficient process reduces the need for manual labour in interviewing, background checking and invoicing and payment processing and thus the Company is able to deliver the solutions at a considerably lower rate than the traditional agency.

KindredCare will directly receive monthly subscriptions on the website with users' preferred payment method, including by credit card, ApplePay, GooglePay, or PayPal.

KindredCare will demonstrate commitment to its service quality by means of a Service Level Agreement (SLA), through which it defines the Company's targeted uptime of the platform as well as remedies should the agreed-upon service levels not be achieved.

OPERATING PLAN

BUSINESS LOCATION

What type of space do you need upon arrival in Canada? (Tick all that apply)

☐ Maker Space ☒ Office Only ☐ Warehouse ☐ Retail (storefront) ☐ Commercial

Have you looked into locations in Canada? ☐ YES ☐ NO

What to include here:

- Have you looked at costs related to space needed? Please describe in details, your location needs.

The Company will benefit from the office facility offered by the Spark Centre. The Company's software engineer will utilize the space for developing and testing the software. The office will further facilitate sales and marketing as well as daily operations.

EQUIPMENT

What to include here:

- What equipment do you need to operate your business?
- Will you need to purchase new / used equipment?
- Have your sourced equipment needed?

KindredCare will not require specific equipment for operating its business. The Company will purchase a computer and basic office suite software for daily operations. The Company will allocate approximately \$375 monthly for software subscriptions.

TECHNOLOGY REQUIREMENTS

What to include here:

- Have you identified what technology you need to operate your business? (internet service, business software, IT infrastructure etc)
- Have you sourced technology partners?
- What will it cost?

KindredCare will be able to conduct its operations with computers/laptops, servers and basic office software including customer relationship management (CRM) and content management software (CMS).

REGULATORY COMPLIANCE

What to include here:

- Do you need any special permits or licensing to operate in Canada?
- Are you subject to hazardous waste compliance, pollution monitoring or packaging regulations?
- Are there any Canadian laws that could impact your business?

KindredCare will not require any license or permit to operate in Canada. KindredCare is committed to facilitating compliance with all stakeholders – seniors, caregivers and LTC facility management. It will adhere to relevant Canadian regulations for ensuring business viability and continued growth. KindredCare will adhere to the Canada Labour Code and provincial/territorial labour laws by ensuring compliance for wages or salaries posted on the platform, and by outlining the terms and conditions of the working environment and treatments that adhere to labour laws in most provinces and territories. KindredCare will integrate tools that allow employers to comply with these regulations. The platform is specifically designed to accommodate tax reporting by developing earning statements annually for caregivers to utilize when filing their income tax returns.

In Canada, personal care services such as bathing, feeding and assistance with dressing and taking medication are exempted from GST/HST. Thus, the platform will not apply GST/HST to the payment of caregivers.

The Company will adhere to the Personal Information Protection and Electronic Documents Act (PIPEDA), a Canadian law relating to data privacy.

FINANCIAL MANAGEMENT *(narrative to the financial model)*

What to include here:

- Describe your sales model. (tie to financial model)
- Describe your cost of goods sold and gross margins.
- Overview of your operations, facility and hiring plan.
- Overview of costs to get started.
- Optional:
 - o What is your cash burn rate? (calculated in model)
 - o Revenue / employee (calculated in model)
 - o Operating expenses / employee (calculated in model)

FINANCIAL WORKBOOK - to be completed as an attachment and submitted along with the Business Plan.

Please Note: You will find instructions for creating your financial statements within the Spark's financial workbook. If you haven't received this, kindly send a mail to **bp@sparkcentre.org** to have it sent to you.

KindredCare will generate revenue from an average monthly subscription of \$240 for LTC operators and a commission fee of 7.5% for each completed caregiving task processed on the platform. The Company anticipates receiving 80% from its revenue from the commission fee and 20% from the monthly subscription fee.

As a software company, KindredCare will not incur costs of goods sold (COGS) associated with its revenue. The Company anticipates operating from the Spark Centre office during its first year, thus negating the rental cost during this period. It anticipates spending a monthly marketing budget of approximately \$4,000 – including for membership fees with associations, digital marketing campaigns, sponsored articles in senior magazines and on association websites, and more.

The co-founders will invest \$200,000 into the venture, of which \$94,200 will contribute to the MVP development and other start-up expenses while \$18,000 will contribute to computer and server purchase and the remaining \$87,760 will comprise the working capital.

DESCRIPTION OF MANAGEMENT TEAM

What to include here:

- Include name, title, short bio and responsibilities.
- Appendix – can include resumes.

KindredCare is a brainchild of three co-founders: Sarmin Akter (50% shareholding), Dr. Tanzila Rawnuck (40% shareholding) and MD Jahangir Alom (10% shareholding).

Sarmin Akter, CEO. Mrs. Akter contributes a decade's experience in human resources and social welfare, including three years in a senior role within the fashion industry. Her role is critical for the implementation of the company-wide compliance with Bangladesh Labour Law. She exercised effective communication between the management team and workers and oversaw the implementation of the law while encouraging workers to perform at their best through on-the-job practicums and safety training. Mrs. Akter holds a Bachelor of Social Science (2004) and Master of Social Science (2008) from National University.

The roles and responsibilities of Sarmin Akter as the Company's CEO encompass:

- Developing and implementing business strategies and plans ensuring their alignment with short-term and long-term objectives
- Developing relationships with caregivers
- Overseeing all operations and business activities to ensure they produce the desired results and are consistent with the overall strategy and mission
- Improving the planning and budgeting process on a continual basis in collaboration with a professional accounting firm

Dr. Tanzila Rawnuck, COO. Dr. Rawnuck has over 13 years' research and academic experience while concurrently serving as a shareholder and policy developer with a pharmaceutical company in Bangladesh, Kemiko Pharmaceutical Company. She has further accumulated seven years' experience with a giant multipurpose company, Krishibid Multipurpose Co-operative Group, of which she is a shareholder. Her extensive entrepreneurial and business management experience will contribute insights to KindredCare's business and marketing strategies and management. Dr. Rawnuck's academic accomplishment is demonstrated by the successful completion of her PhD in Biological Sciences (2017) from University of Rajshahi. She further holds a Master of Public Health (2014) and Bachelor of Medicine and Surgery (MBBS) (2007) from University of Dhaka.

The roles and responsibilities of Dr. Tanzila Rawnuck as KindredCare's COO include:

- Setting comprehensive goals for performance and growth
- Managing resources for achieving the Company's objectives
- Supervising employees to encourage maximum performance and dedication
- Managing third-party providers including accounting firm, marketing agency and other professional organizations
- Evaluating performance by analyzing and interpreting data and metrics

MD Jahangir Alom, CFO. Mr. Alom has over 13 years of experience in accounting, finance and internal auditing. He has served as the Deputy Manager of the Runner Group since July 2018. In this role, he is responsible for conducting risk-based audit planning and scheduling, analyzing and reporting on financial data and more. He will be primarily responsible for budget planning and oversight, financial statements and analysis and cost management and analysis at KindredCare.

Mr. Alom holds a Bachelor of Business Studies (2008) from National University, a Master of Business Administration (2011) from East West University and a Master of Business Studies (2013) from National University.

DESCRIPTION OF ADVISORY TEAM

What to include here:

- Do you have any lawyers, accountants, financial advisors, trade/distribution consultants, external sales representatives, other consultants that offer you advice & support for your business?
- Please list (you can include Bios or resumes if you have them)

The Company has not yet assigned an advisory team. The co-founders will consider forming an advisory team upon their arrival in Canada.

KEY EMPLOYEES

What to include here:

- What employees are integral to your business?
- Who are your next hires?
- Include details of the start date, salaries, etc. in the financial model.

The Company will hire the following employees within its first year:

- AI Software Developer, whose responsibility encompasses developing the software algorithm and visually appealing front-end web and app design, user interactions on web pages

Timeline of hiring: Month 1, Year 1; Salary: \$85,000

- Account Manager, whose responsibility encompasses creating and maintaining client accounts by developing relationships and understanding their needs for feedback in product development and fostering long-term relationships

Timeline of hiring: Month 4, Year 1; Salary: \$65,000

- Sales Representative, whose responsibility encompasses generating and securing new leads among LTC homes and caregivers

Timeline of hiring: Month 3, Year 1; Salary: \$55,000

ACTION PLAN

OBJECTIVES

What to include here:

- What are your business goals in the short term, long term?
- What can you work on now while waiting for your work permit (WP) or permanent residence (PR)?

The Company anticipates achieving an annual revenue of \$284k with the hiring of three (3) employees. The Company aims to grow revenue to \$3.2 million and increase hiring to six (6) employees, in addition to the co-founders, by the end of year 3.

The co-founders will commence the development of the hardware and software while waiting for their permanent resident card (PR). They anticipate completing the MVP in Q2 2023 for beta testing in Q3 2023.

RESOURCES REQUIRED

What to include here:

- Can you meet your immediate goals with your current resources?
 - This includes people & money.
- What do you need to get started?
- Do you need a bank loan or an investor? Are you going to self-fund your business?

The co-founders have committed \$200,000 in start-up funding to fulfill the requirements of the start-up launch. The funding will be allocated to incorporation expenses (\$330), copyright application (\$660), MVP development (\$83,500), initial marketing (\$9,750), as well as the purchase of a computer and server (\$18,000).

The co-founders will not require any loan or investor funding. They will self-fund the business.

ACTION PLAN

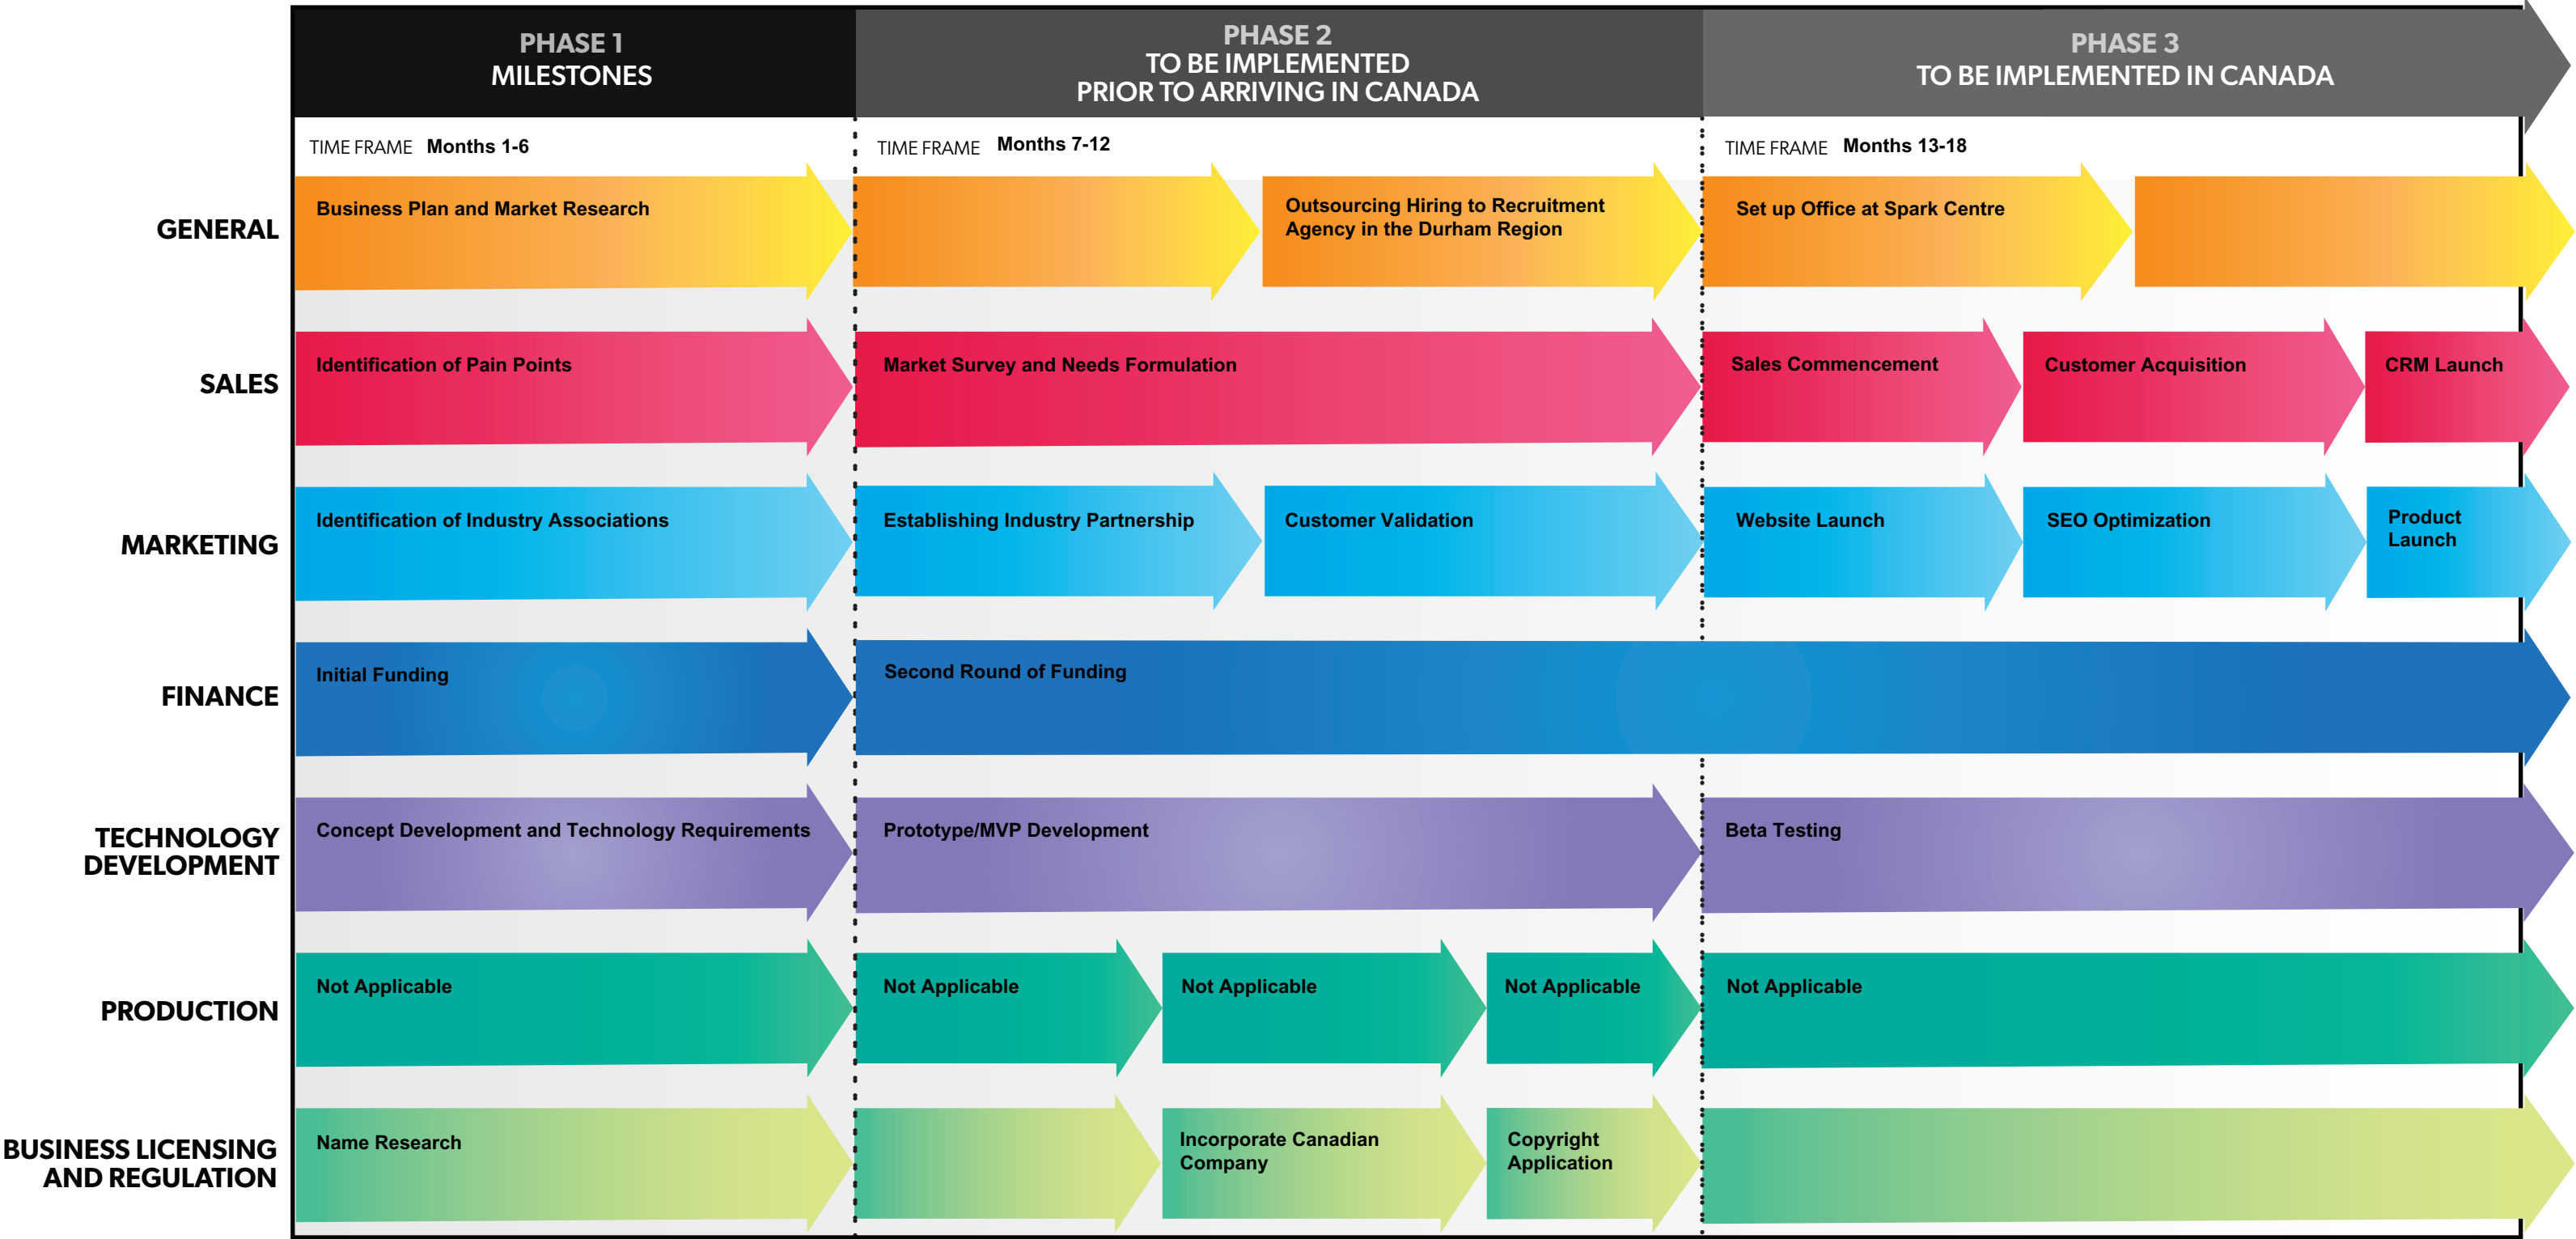

What to include here:

- Timeline with key milestones / metrics – person responsible.
- Include things like:
 - o Registering / Incorporating a Canadian business.
 - o Setting up Canadian bank or alternative identified.

Use **Chart 1: Business Milestones (on page 36)** to capture the company's milestones in 3 phases- Phase 1: Already completed, Phase 2: Will be completed before coming to Canada, Phase 3: Will be implemented upon arrival in Canada.

KindredCare is currently within a second stage of the Technology Readiness Level (TRL). The co-founders have identified the technology requirements that address the needs of an automated intelligent matching platform to address the need for caregivers for both in-home and LTC settings. They anticipate completion of the MVP in Q2 2023 and beta testing in Q3 2023.

CHART 1: BUSINESS MILESTONES

APPENDIX

PRODUCT/SERVICE DEVELOPMENT MILESTONES

What stage is your product or service at and what are the accomplishments so far? Have you created a prototype/MVP, have you tested the technology, have you identified the required regulatory standards and licenses, have you identified your supply chain?

Capture the product or service development milestones in 3 phases- Phase 1: Already completed, Phase 2: Will be completed before coming to Canada, Phase 3: Will be implemented upon arrival in Canada.

Use **Chart 2: Software Development (on page 38)** if your product or service is Software and use **Chart 3: Hardware & Software Development (on page 39)** if your product or service is a Hardware or a Hardware + Software combined.

CHART 2: SOFTWARE DEVELOPMENT

*To replace the sample milestones with your own, click the chart, then edit text.

SOFTWARE DEVELOPMENT CHART

Fillable chart located on page 38

CHART 3: HARDWARE + SOFTWARE DEVELOPMENT

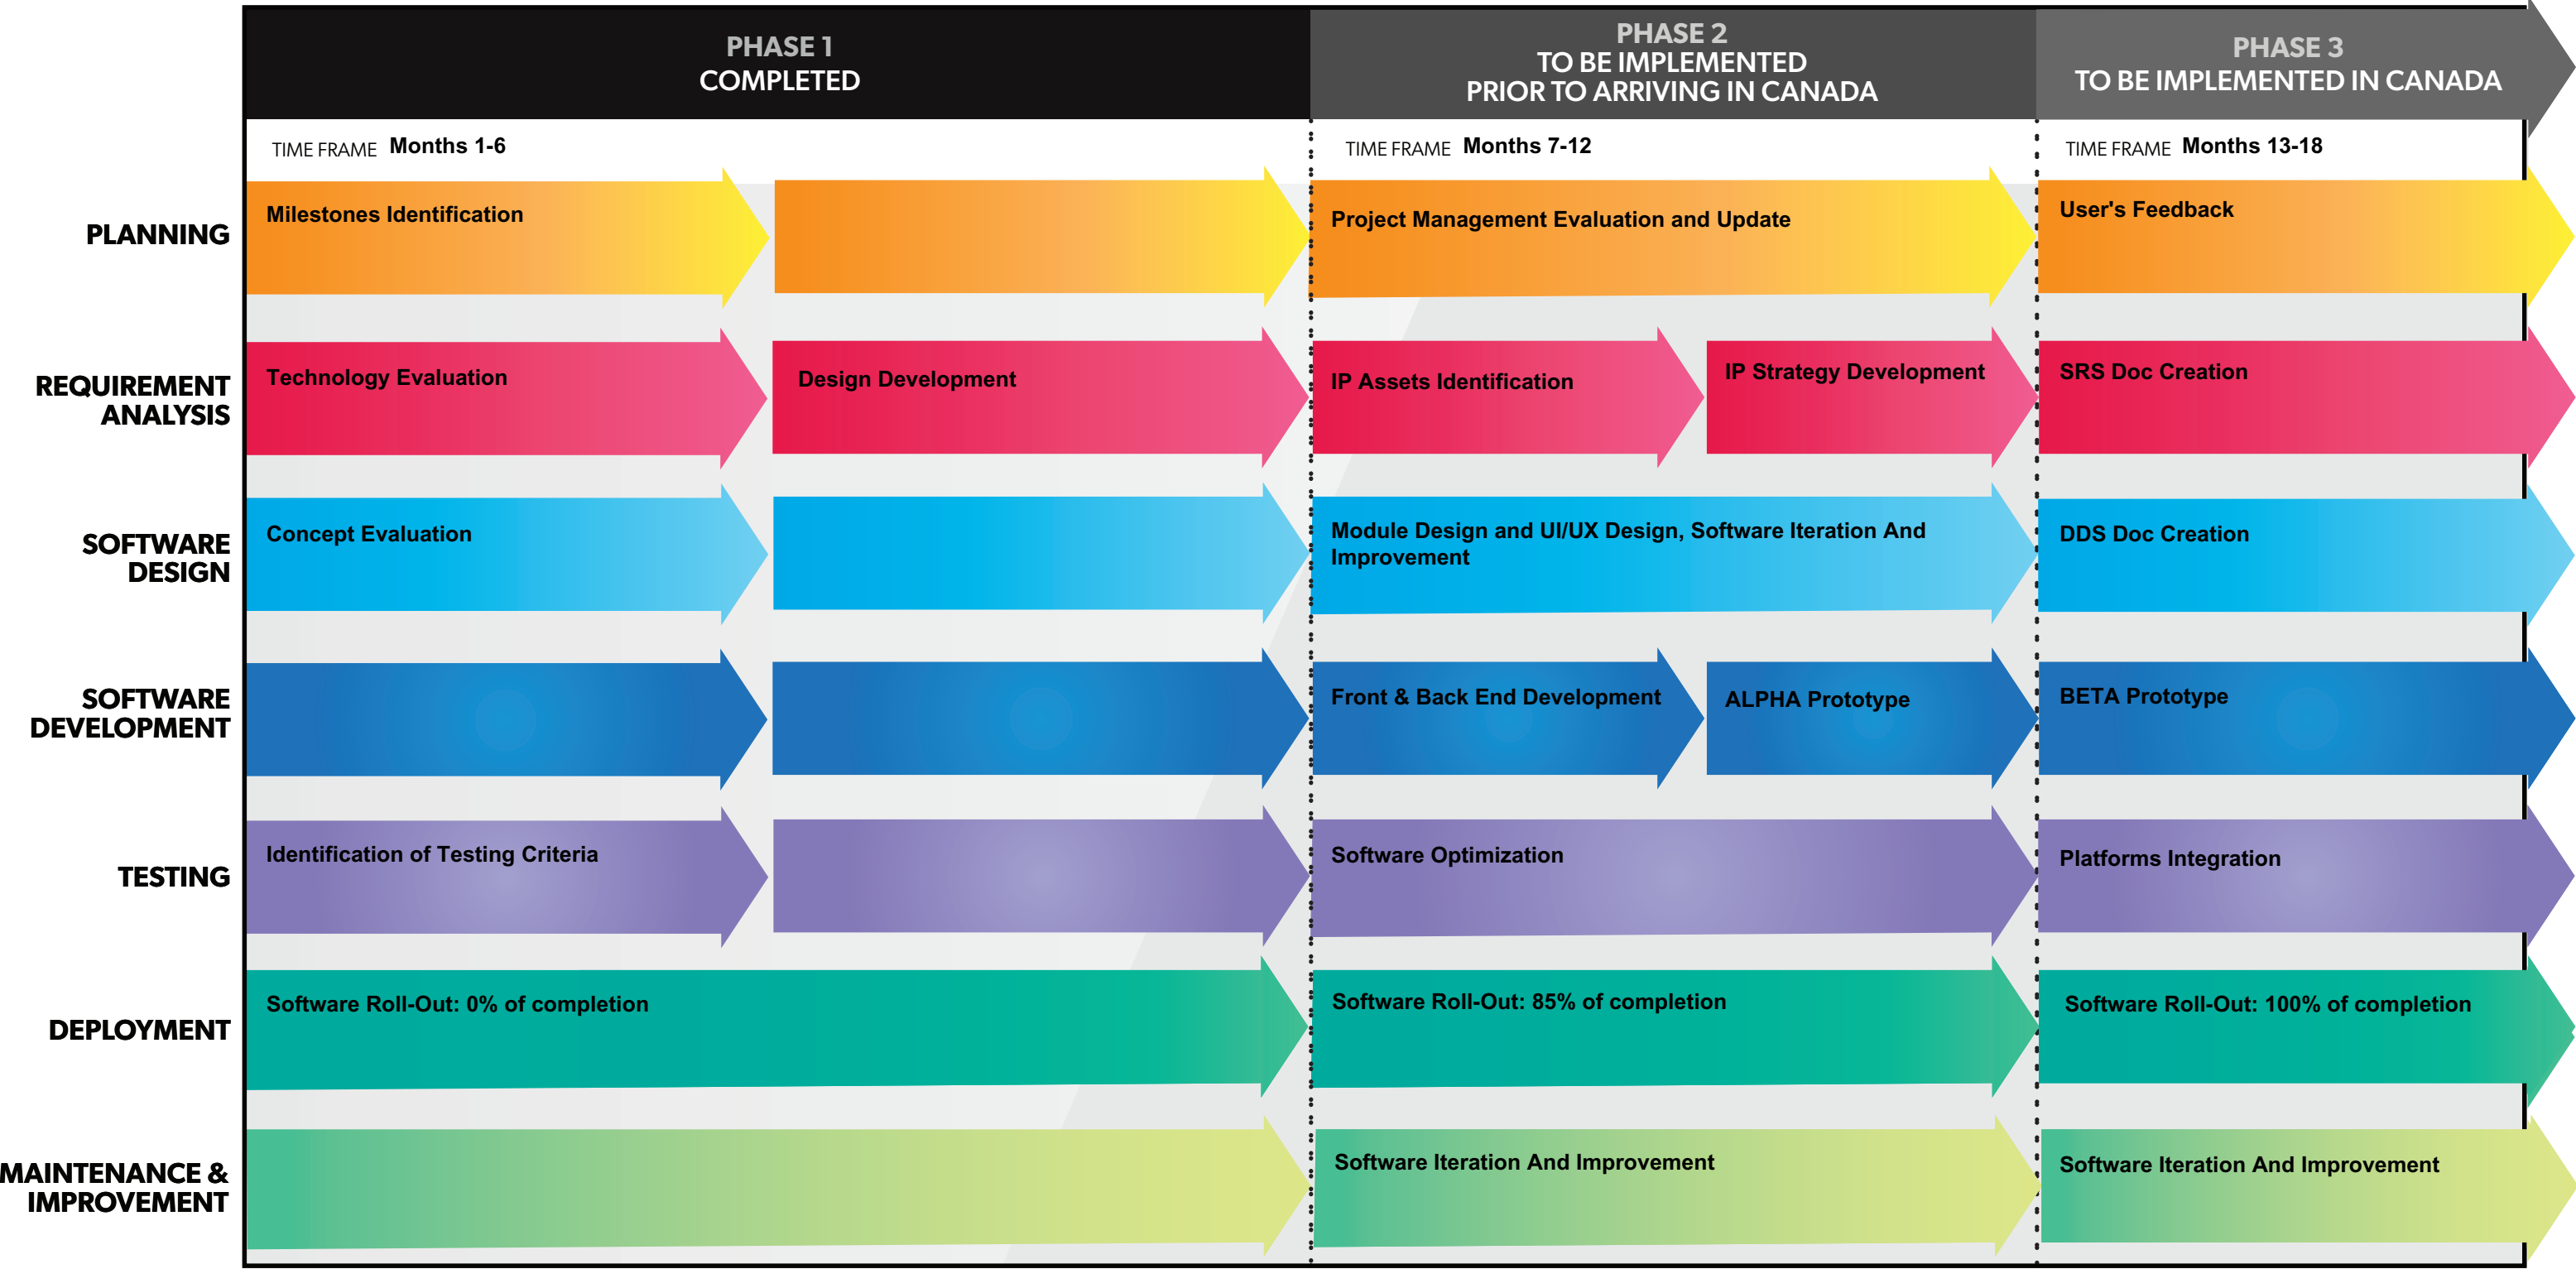

*To replace the sample milestones with your own, click the chart, then edit text.

HARDWARE & SOFTWARE DEVELOPMENT CHART

Fillable chart located on page 39

CHART 2: SOFTWARE DEVELOPMENT

*To replace the sample milestones with your own, click the chart, then edit text.

RISK ASSESSMENT & CONTINGENCY PLAN

What to include here:

- Identify any internal/external events that could impact your timeline.
- Do you have the right employees in place or the ability to hire them?
- Any delays for product development, product delivery, inventory.
- Anything that could impact cash flow or ability to get started.
- Do you have a plan B?

As an intelligent caregiver recruitment software, KindredCare's launch and growth will suggest the following possible risks:

Resources Risk. KindredCare's success will be further dependent on the credentials of its personnel. The co-founders will thus reach out to local universities – Durham College and Ontario Tech University - for potential hiring of their graduates to fill skilled positions such as AI software engineer. The Company will further seek assistance from a local recruitment agency to hire some of the other available positions.

Market Adoption Risk. The caregiver community and LTC operators will be unfamiliar with the software. The Company will mitigate the risk by launching both digital marketing campaigns targeting caregivers, and direct marketing to senior and LTC associations to demonstrate the software capabilities.

Competitive Risk. KindredCare's timely rollout will mitigate against the threat of new and similar caregiver matching/recruiting platforms for seniors and LTC homes. There is currently no intelligent platform for facilitating recruitment of caregivers for seniors and LTC homes in Canada, which presents a unique opportunity to KindredCare.

Threat Mitigation. The Company will monitor the potential external threat by continually staying up to date with industry news through AGE-WELL, the Information and Communications Technology Council (ICTC) and other technology-based organizations that support technology applications for seniors and Canada's digital economy.

The Company's co-founders will ensure the application of the latest technologies and filing of the software copyright to create a barrier to entry of new platforms. The co-founders will continually assess the competitive landscape and ensure that KindredCare continually implements the latest technology.

SWOT Analysis Template

STRENGTHS

WEAKNESSES

OPPORTUNITIES

THREATS

List Your **STRENGTHS**

AI-based caregiver recruitment platform created to improve the efficiency of caregiver hiring by LTC and directly by seniors and their family members

Combined expertise of co-founders in entrepreneurship and business management, human resources, and finance and accounting

End-to-end platform with advanced search, automated background verification and electronic visit verification

Payment processing to round out the complete experience of hiring caregivers

List Your **WEAKNESSES**

Low brand awareness in Canada. The co-founders will focus on developing case studies and video explainers following a successful completion of beta testing to market the platform in Canada

List Your **OPPORTUNITIES**

Fast growing seniors population in Canada

Staffing shortages in LTC facilities

Technology acceptance and usage among seniors

International students and immigrants seeking for Canadian experience

Absence of Canada-based intelligent software for facilitating caregiver recruitment

List Your **THREATS**

Similar AI solutions for facilitating caregiver recruitment for seniors and LTC operators
